

Salma BEN HADJ ALI

Senior Full-stack Developer **PHP | SYMFONY | REACT**

PROFIL

- ◇ 14 years of experience in development, progressing into technical leadership roles.
- ◇ Expertise in Agile, Symfony, and React.
- ◇ Passionate about coding and building high-performance solutions.
- ◇ Strong commitment to technical excellence and team success.
- ◇ Proven ability to lead teams toward ambitious goals.

EXPERIENCE

Senior Backend Developer at *Believe*

05/2025 - actual
1 year 1 month

Believe is a leading digital music company specializing in music distribution and digital services for artists and labels worldwide.

Migration Task Force – Cloud Modernization

- ◇ Migrated more than 20 legacy batch applications from on-premise infrastructure to a cloud-native architecture on Google Cloud Platform
- ◇ Designed and implemented scalable workloads on Kubernetes (GKE) leveraging Cloud Storage, Secret Manager and ArgoCD
- ◇ Collaborated with multiple teams to gather business requirements, recover legacy knowledge and ensure successful migrations
- ◇ Conducted end-to-end development activities, including functional analysis, implementation, testing and production deployment
- ◇ Performed code reviews and contributed to the adoption of development best practices
- ◇ Delivered migration milestones within a constrained timeline, achieving the strategic objective before the end of 2025
- ◇ Improved system observability, monitoring and alerting capabilities through modern cloud-native tooling

Release and Recording API

- ◇ Designed and developed new features for Believe's core music catalog domains, including Releases, Recordings and Tracks
- ◇ Applied Domain-Driven Design principles using Aggregates, Domain Services and Value Objects to model complex business rules
- ◇ Defined and implemented Hexagonal Architecture patterns, including ports and adapters separation
- ◇ Contributed to the evolution of a modern distributed architecture integrating Kafka and cloud-native services
- ◇ Ensured code quality through continuous refactoring, automated testing and peer code reviews
- ◇ Collaborated closely with product and technical stakeholders to deliver scalable and maintainable solutions
